

Graduate Student Scholarship
Tohoku University Global COE Project
“Materials Integration”

The Tohoku University Global COE project is now looking for motivated PhD graduate student candidates in the field of materials science and engineering. Applications are to be made to International Doctoral Programs in School of Engineering (Dead line is Feb. 5)

<http://www.eng.tohoku.ac.jp/english/program/?menu=itn>

or International Graduate Program for Advanced Science (IGPAS) in School of Science (Dead line is Jan. 31).

<http://www.sci.tohoku.ac.jp/english/2nd/igpas.html>

These two programs can offer only limited numbers of the scholarship from Japanese government (Monbukagakusyo). Global COE will support those who failed the competition but still wish to pursue PhD under the supervision of Global COE member professors.

How to apply

1. Contact with one of the Global COE professors and apply for one of the international graduate courses with a guidance of the professor.
2. Send a complete copy of application form to the professor. He/she will forward it to Global COE scholarship selection committee.
3. The selection is made and result will be informed soon after these two International Programs decide the scholarship winners who are to be recommended to Monbukagakusyo. We plan to offer the scholarship to several students.
